

Experiment 31

Web Blog Using WordPress Demonstrating Anchor Tag, Title Tag, etc.

1. Aim

To create a web blog using WordPress and to demonstrate the use of essential HTML tags such as the anchor tag and the title tag within the blog content.

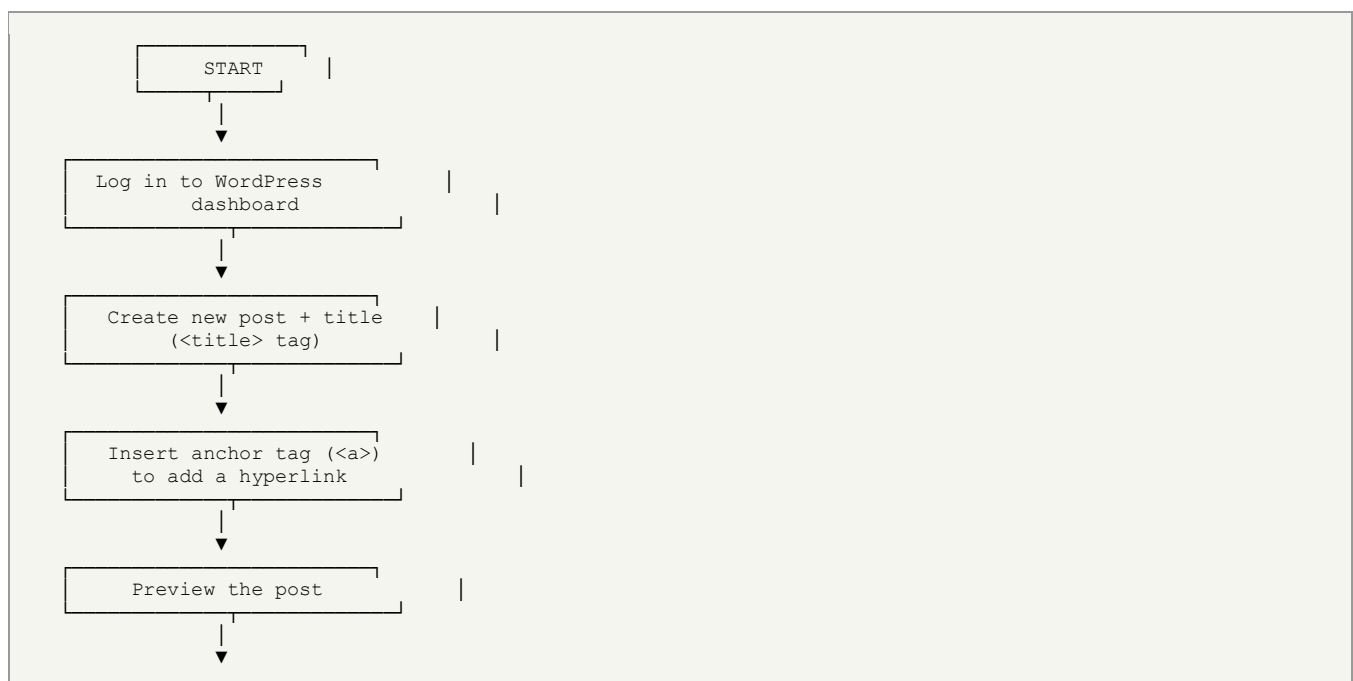

2. Objective

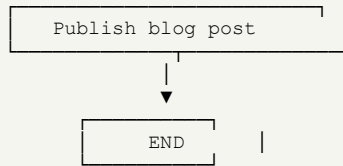

- To understand the process of setting up a blog/website using WordPress.
- To learn how the title tag defines the page title shown in the browser tab and search results.
- To learn how the anchor tag is used to create hyperlinks within blog content.
- To publish a working blog post and verify the tags render correctly in the browser.

3. Algorithm

1. Start the program.
2. Install WordPress locally or sign up on wordpress.com, and log in to the dashboard.
3. Create a new post from Posts > Add New.
4. Set the post title, which WordPress renders inside the HTML <title> tag.
5. Switch to the Custom HTML block (or the Code editor) to insert custom HTML.
6. Add heading tags and an anchor tag () to link to an external or internal page.
7. Preview the post to verify the title bar and hyperlink render correctly.
8. Publish the post and view the live blog in the browser.
9. Stop the program.

4. Flowchart

5. Code with Output

Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>My First Blog - Web Development Lab</title>
</head>
<body>

  <h1>Welcome to My Blog</h1>

  <p>
    This is a sample blog post created in WordPress,
    demonstrating the use of the title tag and anchor tag.
  </p>

  <!-- Anchor tag: creates a hyperlink to an external page -->
  <p>
    Learn more about WordPress at
    <a href="https://wordpress.org" target="_blank">wordpress.org</a>.
  </p>

  <!-- Anchor tag: internal link to another section -->
  <p>
    <a href="#about">Jump to the About section</a>
  </p>

  <h2 id="about">About this blog</h2>
  <p>This blog was created for a Web Development lab experiment.</p>

</body>
</html>
```

Output:

Browser tab shows: "My First Blog - Web Development Lab" (from <title>)

Rendered page:

Welcome to My Blog

This is a sample blog post created in WordPress, demonstrating the use of the title tag and anchor tag.

Learn more about WordPress at wordpress.org (hyperlink, opens in new tab)

[Jump to the About section](#) (hyperlink, scrolls to #about)

About this blog

This blog was created for a Web Development lab experiment.

Post successfully published and viewable at the live blog URL.

6. Result

A WordPress blog was successfully created, and the title tag and anchor tag were demonstrated: the title tag set the browser tab text and the anchor tags created working external and internal hyperlinks.

7. Conclusion

Thus, a web blog was successfully created using WordPress, and the anchor tag and title tag were demonstrated within the published post. The experiment shows how basic HTML tags integrate into a WordPress post to control page identity and navigation.
